B.A.B.Y. Program at Yale New Haven Hospital

We understand the challenges you face as a new mom with a newborn. Our new post-discharge breastfeeding program, Breastfeeding Advances Baby's first Year (B.A.B.Y.) offers lactation screening, breastfeeding education and peer support. In accordance with the Baby-Friendly Hospital Initiative (BFHI) and Healthy People 2020, our goal is to provide the education and support you need to ensure your breastfeeding success and help you maintain exclusive breastfeeding for six months, with sustained breastfeeding through baby's first year.

We encourage all new breastfeeding moms to attend this program. The program will cover common post-discharge breastfeeding problems. You and your baby will be screened for individual concerns by our lactation consultants, certified nurse midwives and pediatricians as needed.

While this doesn't replace your routine pediatric and OB/GYN office visits, you can take advantage of this breastfeeding support as often as you'd like once you've had your initial visit. The program is offered **Mondays from 1 - 3 pm and Thursdays from 6 - 8 pm**. For more information, please call **203-789-4280**.

Online registration is available: <https://www.ynhh.org/events/baby-program>
